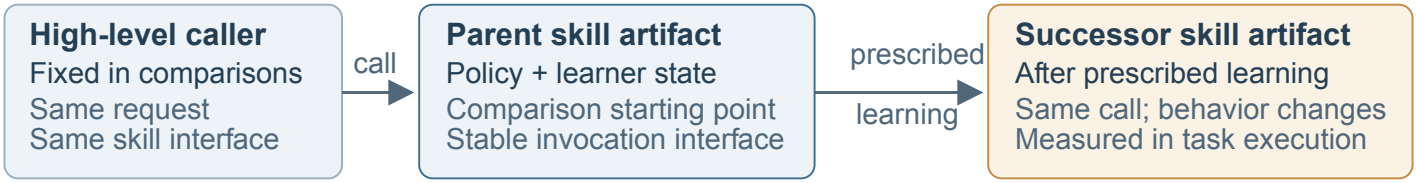
STABLE CALLER, CHANGING SKILL ARTIFACT



THREE CONTROLLED LEARNING CONTRASTS

01 Acquisition

Failed capability call
Prescribed learning stage
Saved child invoked again
Parent vs child behavior

02 Learning paths

Continue or branch
Complete-parent paths
Match endpoint controls
Different training ancestry

03 Correction

Actual-loss or drift selection
Stored / attempted-new data
Include ordinary continuation
Success / retention / repair

DISTINCT OUTCOMES — NOT ONE SUCCESS SCORE

Acquisition	Retention	Repair	Cost
New successes	Successes kept / lost	Target failures resolved	Updates / actions / time

Scope: simulated tasks; separate study panels; protocol-fixed operations.
Autonomous operation selection and recursive self-improvement were not evaluated.
